Added ASCII output mode in the MIFARE sector decoder plug-in

V3.0.7

Added support for Sony RC-S380 and contactless licensing

Added NFC decoder and MIFARE sector decode plug-ins to installer package

Read-a-Card has come a long way since it was first released in 2008! We won't bore you with all the details, but suffice to say that it has been updated many times, to add support for new readers and card types, and in response to many requests from customers for specific features and improvements.

If you have any suggestions or requests, please contact us via support@read-a-card.com
